# Desktop High-speed Refrigerated Microcentrifuge

—LX-165T2R

### **Scope of Application**

Mainly used for nucleic acid extraction, DNA/RNA separation, purification, virus separation and protein precipitation in the laboratory. Widely used in universities, third party testing organizations, disease prevention, medical and health, biological pharmaceutical and other related fields.

- High-performance, dual frequency conversion refrigeration technology rapidly cools to 4°C in 5 minutes to speed up processing time.
- Stable, ergonomic design with low centre of gravity, balance detection and real-time vibration monitoring for optimal safety.
- Automatic rotor ID, rotor information and service life statistics can be traced.
- Equipped with a 24-well 1.5/2.0 ml centrifuge tube rotor with a maximum centrifugal force of 25,872 xg.
- 7-inch interactive touchscreen with intuitive controls and easy-to-read displays.

#### Qingdao Haier Biomedical Co.,Ltd.

### **Desktop High-speed Refrigerated Microcentrifuge**

**Product Advantages** 

#### Smart and Intelligent Control, Superior Safety

Large smart screen controller provides an interactive interface which is easy to operate even in gloves.

#### Intelligent Centrifugal Management System

programs, quick access to pro- time. grams.

Operation failure detection, rotor Intelligent storage of centrifugal Fast refrigeration preset, saves

Intelligent lid locking monitoring Safer by design, triple-layer conand automatic self-locking to struction to ensure safe use. ensure safe operation.

Multi-level user management, effectively protects personal data.

Intelligent monitoring of temperature, speed, vibration and rotor to ensure reliable operation.

### **Desktop High-speed Refrigerated Microcentrifuge**

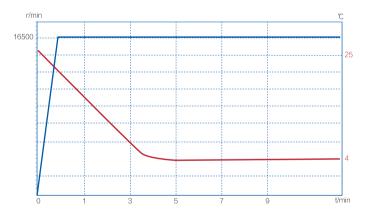

#### Auto-ID Instant Rotor Identification and Rotor Service Life Statistics

- Auto-ID instant rotor identification: Install the rotor and the centrifuge will automatically identify the rotor model to ensure safe operation within rotor model limits.
- Rotor ID: each rotor is equipped with a unique ID which enables traceability of rotor information.
- Rotor service life statistics: rotor service time is recorded on the terminal and provide early warning as the rotor reaches the end of its service life.

#### Balance Detection

- Vibration monitoring of the whole machine: designed with six-axis gyroscope technology, the machine will stop automatically if the vibration exceeds safe limits.
- Rotor balancing detection: dynamic monitoring of the centrifugal process, active recognition of balance errors and automatic shutdown control.
- Centrifuge balancing detection: built-in electronic gradienter, automatically monitor the unit balancing status.

#### Precise Temperature Control and Ultra-fast Refrigeration

- Dual frequency conversion refrigeration technology ensures rapid refrigeration, reducing waiting time.
- High precision throttling technology proactive adjusts to provide precise temperature control.
- Seamless copper tube wrapping technology to achieve high efficiency heat transfer.

#### Leading Global Manufacturer, Quality and Safety Guaranteed

- Extensive quality assurance and testing process ensures the reliability of operation.
- High-precision speed control technology to ensure the accuracy of experimental data.
- Advanced dynamic balance monitoring technology to ensure the safe operation of the rotor.

### **Desktop High-speed Refrigerated Microcentrifuge**

**Ergonomic Design** 

#### **Ergonomic Design**

Designed with multiple user applications, the touchscreen is angled to provide a clear view and is comfortable and practical for users of all heights.

#### Smart Lid Lock

The automatic lid lock monitors the lid closing status, as the door is closed, it will tighten automatically indicating when the unit is safe to use.

#### **USB Interface**

Data can be exported using a USB interface, such as operational records, error records.

Model	Max speed (r/min)	Speed Accuracy (rpm)	Max RCF (xg)	Sound level (dB)	Temperature Setting Range( <sup>°</sup> C)	Timer	External Dimensions (W*D*H mm)
