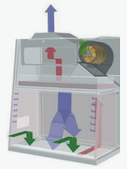
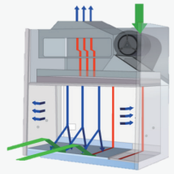
Differences between Biological Safety Cabinet and Laminar Flow Cabinet

Working Principles

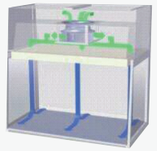
Clean air after cleaned Ambient air Polluted air



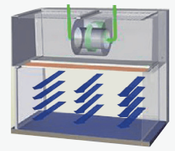
Biological safety cabinet, Class II Type A2



Biological safety cabinet, Class II Type B2



Vertical laminar flow clean bench



Horizontal laminar flow clean bench

Functions

Product Category	Airflow Circulation	Applications	Air Supply Mode	Filter	Operator Protection	Sample Protection	Environment Protection
Biological safety cabinet, Class II, Type A2	70% circulated, 30% discharged	Operation of pathogenic bacteria, mold, yeast and other hazardous samples	Negative pressure (Air pulled into cabinet)	High efficiency	√	√	√
Biological safety cabinet,Class II, Type B2	100% discharged to outdoor space						
Vertical laminar flow clean bench	100% discharged to indoor space	Operation of non-hazardous bacteria, PIVAS	Positive pressure (Supply air to space outside of cabinet)	High efficiency	×	√	×
Horizontal laminar flow clean bench	100% discharged to indoor space

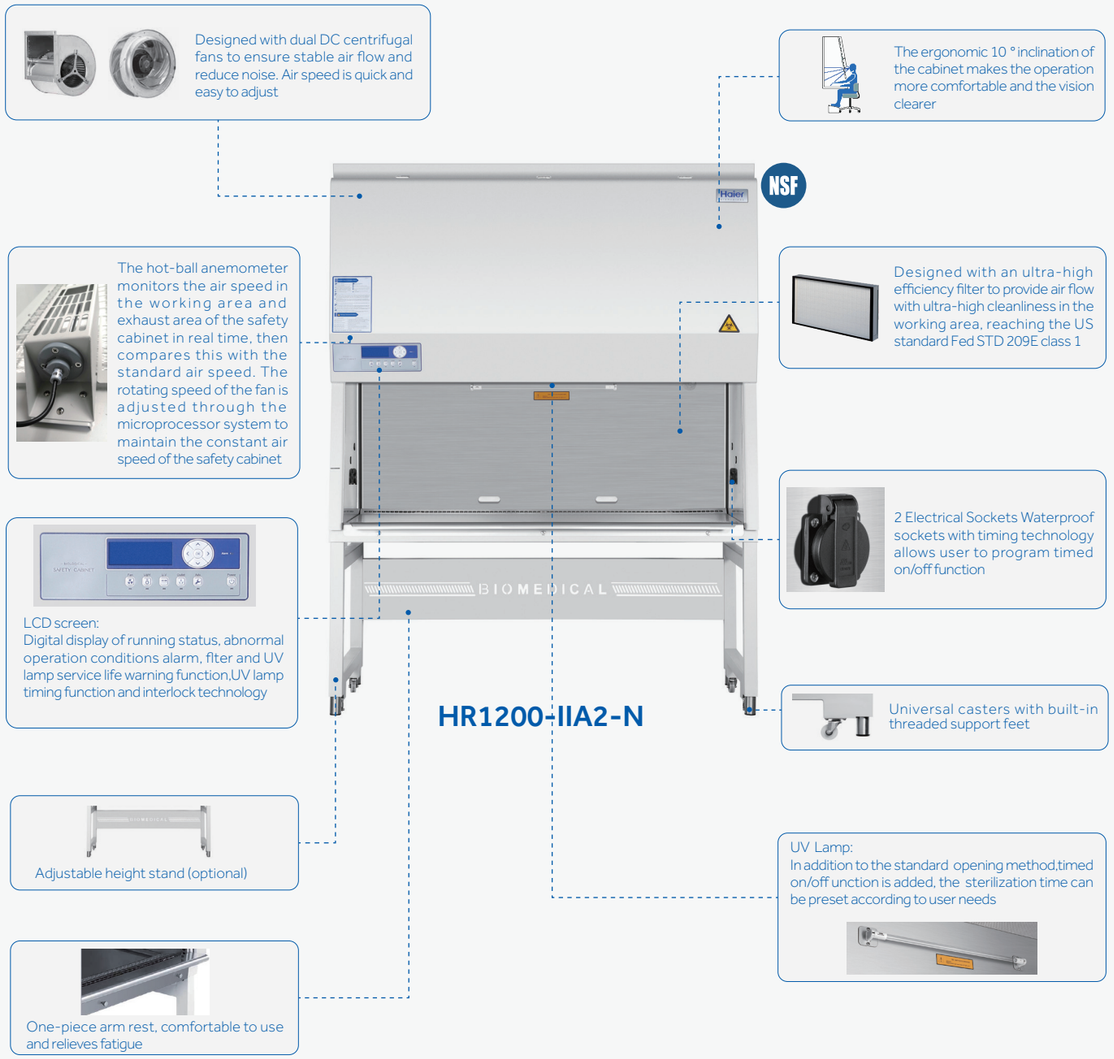
NSF Series Biological Safety Cabinet

Scope of Application

Professional air purifcation equipment suitable for pharmaceuticals, medical and health industries, scientifc research laboratories of universities and colleges as well as other related fields.



Product Advantages

Multiple Voltage Options, Suitable for Many Countries and Regions

Full voltage coverage (100-230V 50/60Hz), suitable for a wide range of countries and regions.

Microprocessor Control System

- Intuitive and informative interactive digital LCD display.
- The hot-ball anemometer monitors the downflow and inflow air speed of the safety cabinet in real time and compares it with the standard air speed. The rotating speed of the fan is adjusted through the microprocessor system to maintain the constant air speed of the safety cabinet.
- Real-time display of operational information and parameters including downflow air velocity, flow rate, temperature, humidity, positive pressure, negative pressure, fan cumulative running time and filter remaining service life.
- One button UV lamp timer function, allows users to set 0 to 24 hours of automatic on/off time.

Ultra-low Noise, Uniform Airflow

Designed with Dual DC centrifugal fans, combined with an innovative air distribution system, with lower noise, and more uniform air flow.

Superior Filter, Multiple Protection

- ULPA is made of moisture-proof and flame-retardant glass fiber filter paper which can intercept 99.9995% solid particles with a diameter of 0.12 μm to ensure high cleanliness of air supply flow and exhaust flow.
- Perfect air distribution design, no turbulence in the working area.
- Sound and light alarm function for abnormal parameters.

One-piece Welded Cabinet Structure, Leak Proof

Prevention of leakage performance of dangerous factors conforms to NSF specification.

NSF Series Biological Safety Cabinet

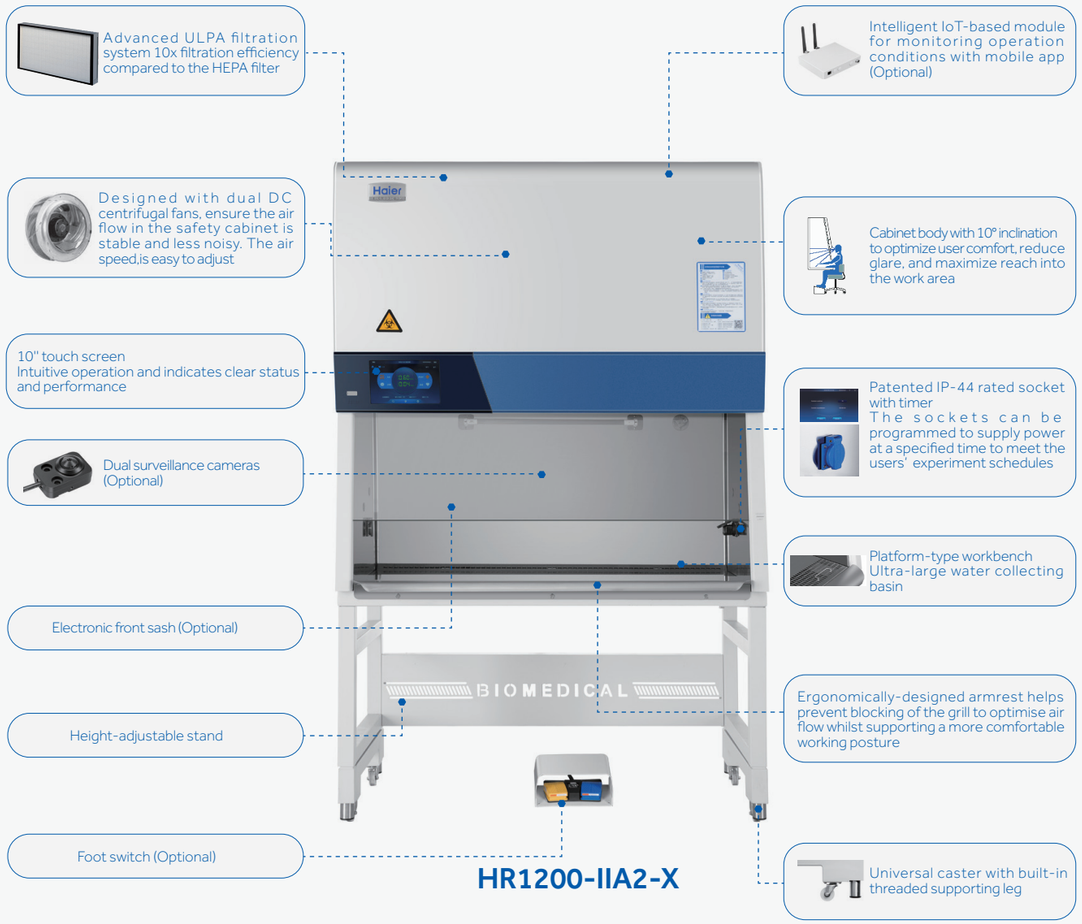
Smart IoT Series Biological Safety Cabinet

Scope of Application

The X series of standard Class II microbiological safety cabinets are suitable for basic cell biology, microbiology, biomedicine, biosafety laboratories and other laboratories.



Smart IoT Series Biological Safety Cabinet

Product Advantages

Microprocessor Control System

- Utilizing intelligent constant air speed design to monitor the downward airflow and the inlet airflow in real-time. The dual air speed sensors adjust the fan speed through a microcomputer system so as to maintain constant air speed inside the cabinet
- Intuitive and informative interactive touch screen
- Real-time display of operational information and parameters including downflow air velocity, flow rate, temperature, humidity, positive pressure, negative pressure, fan cumulative running time and filter remaining service life

Electronic Front Sash (optional)

With push button simplicity the front window automatically opens to the correct aperture mandated by regional regulation to help ensure proper working conditions

Dual Cameras (optional)

As an option, two surveillance cameras can monitor and record the conditions at each side of the working area. The camera is positioned to avoid any splashback within the working area, minimizing cleaning required

Intelligent IoT Module (optional)

An IoT module is an option available to enable users to simply manage the biosafety cabinets, any time anywhere, using our app. The system monitors the cabinet in real-time and alerts in the event of any abnormal alarms. Users can view operational parameters, operation performance curves, event and alarm records as well as other useful information

Ultra-low Noise, Uniform Airflow

Designed with dual DC fans, for up to 50% energy savings vs AC motor, meeting the low-noise, energy-saving and high-reliability requirements

One-touch UV Lamp Operation

One-button UV lamp timer, learns and retains users' UV lamp usage habits for convenient one-key start-up of the UV lamp timing function

Foot Switch (optional)

The foot switch will open or close the front sash to allow users to access samples without direct contact with the sash handle

Easy to Clean

The armrest can be removed and the unique drop-down front sash can be removed in seconds to enable easy cleaning and full access to the cabinet interior work space for thorough cleaning/disinfection

Interlocking Design to Ensure Maximum Safety and Reliability

UV lamp, front sash, fan and interior light operation are interlocked together to protect against harmful UV rays and to prevent leakage of microorganisms

PIR Detection

In intelligent mode, the PIR sensor will detect when the operating area has been clear of personnel for more than 15 minutes and automatically switch to LNS green-saving mode to reduce the noise level, save energy and prolong the service life of filter

Biological Safety Cabinet (Single/Double Exhaust Filter)

Scope of Application

Suitable for microbiology, biomedicine, biosafety laboratories and other laboratories. It offers three levels of protection-operator, product and environment

HR1200-IIA2-S
(Single Exhaust HEPA)
HR1200-IIA2-D
(Dual Exhaust HEPAs)

Product Advantages

Ultra-efficient Filtration

High efficiency moisture proof and flame-retarded filter achieving a retention efficiency of 99.9995% for 0.12 micron solid particle system

Intelligent Constant Air Velocity System

Designed with intelligent constant air speed technology, which can ensure that the working area could have its downflow and inflow velocities in line with the standard requirements

Side Glass Windows

Tempered glass side walls increase visibility and prevents the operator from experiencing a "boxed-in" feeling

Multiple Alarm Functions

Audible and visual alarm functions: filter and UV end-of-life alerts, fan turned-off after door opening alert and door open alarm

Ergonomic Design

- A comfortable platform-type armrest can reduce hand and arm fatigue
- 10-degree angle inclination design, in accordance with ergonomic principles for more comfortable operation
- With height adjustable stand, users can adjust the height of the work bench to requirements

Easy to Clean

The armrest can be removed and the unique drop-down front sash can be removed in seconds to enable easy cleaning and full access to the cabinet interior work space for thorough cleaning/disinfection

Lower Noise and Airflow Uniformity

DC&EC fans operate with lower noise and deliver excellent air flow uniformity

Patented IP-44 Rated Socket with Timer

The sockets can be programmed to supply power at a specified time to meet the users' experiment schedules

UV Lamp

Patented one-button UV lamp technology allows users to automatically activate or deactivate based on usage habits or at specific sterilization intervals to minimise waiting time

PIR Detection

In intelligent mode, the PIR sensor will detect when the operating area has been clear of personnel for more than 15 minutes and automatically switch to LNS green-saving mode to reduce the noise level, save energy and prolong the service life of filter

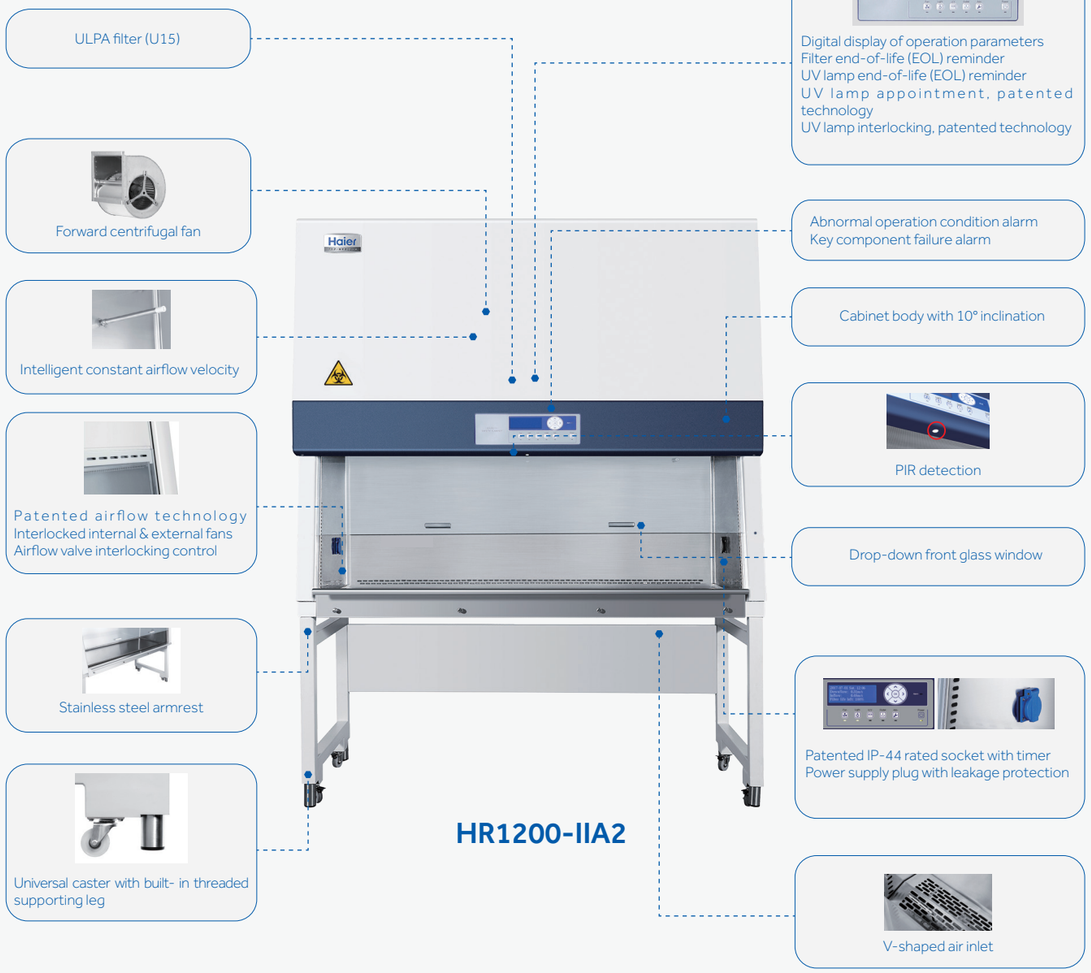
Biological Safety Cabinet

Scope of Application

This Class II microbiological safety cabinet is designed to protect the operator, laboratory environment and samples from being exposed to the infective aerosol produced from samples with bacteria strains, diagnostic materials, and other infective substances. It provides the operator with comfortable and safer working conditions. It is widely used in medical health, disease prevention, food safety, biological pharmacy and environment monitoring.



Biological Safety Cabinet

Product Advantages

V-shaped Air Inlet

The V-shaped air inlet can prevent the samples or arms of operator from blocking the air flow.
The work surface can be easily lifted using the handles for cleaning purposes

One-touch UV Lamp Operation

UV lamp records and remembers users' setting and habits and can be preset with a startup delay with one-key operation for ease and convenience

Energy Conservation

- PIR detection

In intelligent mode, the PIR sensor will detect when the operating area has been clear of personnel for more than 15 minutes and automatically switch to LNS green-saving mode to reduce the noise level, save energy and prolong the service life of filter

Ergonomic

- 10° inclination design of cabinet body

The front operation interface has an ergonomic design of 10 ° inclination for ensuring more comfortable operation

- Stainless steel armrest

A comfortable platform-type armrest can reduce hand and arm fatigue

Easy to Clean

The armrest can be removed and the unique drop-down front sash can be removed in seconds to enable easy cleaning and full access to the cabinet interior work space for thorough cleaning/disinfection

Intelligent

Constant airflow velocity

The hot-bulb airflow velocity transducer performs real-time monitoring of the air velocity of the working area, compares it with the standard air velocity, and keeps a constant air velocity in the cabinet by regulating the fan speed with a microcomputer system

IP 44 Rated Power Sockets with Timer

The sockets can be programmed to supply power at a specified time to meet the users' demands for timing of experiments

Safe

- Abnormal operation condition alarm

Audible and visual alarms in form of voice or text will be present when air turbulence level exceeds 20% and door height (high or low) or work area temperature exceeds limits

- Patented technology: filter end-of-life reminder

Pressure transducer monitors the resistance variation of filter to determine the remaining life of filter and will remind the user by warning when the remaining life is below 10%

- Patented technology: UV lamp end-of-life reminder

The microcomputer will add up the service time of UV lamp, and will remind by warning the user to replace the UV lamp when its remaining life is less than 10%

Offers a Broad Range of Sizes to Fit any Available Laboratory Space

Mini Biological Safety Cabinet

Scope of Application

Small size microbiological safety cabinet for single person operations and small working spaces, suitable for testing stations within warehouse, airports and mobile laboratories.

HR700-IIA2

Mini Biological Safety Cabinet

Product Advantages

Safe and Reliable
Adopts AAF filters, class 1 cleanliness to provide maximum protection for people, environment and samples

Interlocking Function
The product features an interlocking function between UV disinfection, fluorescent lamp, front sash and fan

LCD Display
LCD screen displays various parameters and service life of accessories in real time, and the operational condition of the equipment is clear at a glance

Alarms
Audible and visual alarm functions: hardware failure alarm, operation parameter overrun alarm, filter and UV lamp life warning

One-click Operation
UV lamp one-click reservation allows users to set 0 min to 24 hours of automatic on/off time and sterilization interval, reducing the waiting time

Uniform Airflow
The EBM fan, combined with Haier Biomedical's professional air distribution design, provides lower noise operation and a uniform air flow

Two Waterproof Sockets
Sockets include timing technology to allow users to program socket on/off times

Safety Certified
Complies with EN12469

Classic Series Biological Safety Cabinet (Type A2)

Scope of Application

Professional partial air purification equipment, it is suitable for cell biology, microbiology, biomedicine, biosafety and other related laboratories.

HR30-IIA2

Product Advantages

Patented air flow blocking technology is designed at the upper edge and both edges of front window to eliminate the exposure of microorganisms

Real-time display of key parameters: down-flow velocity, inflow velocity, airflow volume, static pressure, negative pressure, accumulative running time off an accumulative running time of UV lamp, and remaining life of filter

The internal walls on three sides of operation area is constructed by a single plate, and the 12mm arc angle corner for optimal cleaning

The volume of liquid tank is over 4L, designed with outlet valve for convenient cleaning and maintenance

Quality 304 stainless steel work surface without screws, no accumulation of contaminant

Safe

- **Abnormal operation condition alarm**

  Audible and visual alarms in form of voice or text will be present when air turbulence level exceeds 20% and door height (high or low)

Audible and visual alarms for abnormal parameters

- **Filter end-of-life reminder**

  Pressure transducer monitors the resistance variation of filter to determine the remaining life of filter and reminds the user by warning when the remaining life is below 10%

Digital LCD screen

- **UV lamp end-of-life reminder**

  The microcomputer records service times of the UV lamp and will alert the user to replace the UV lamp when its remaining life is less than 10%

Dismountable air in-flow plate, easy to clean and sterilize

- **Interlocking feature to ensure high safety and reliability**

  Patented technology: UV lamp interlocking control

  UV lamp, sash, fan and interior light operation are interlocked together to protect against harmful UV rays and to prevent leakage of microorganisms

UV lamp one-click reservation allows users to set 0 min to 24 hours of automatic on/off time and sterilization interval, reducing the waiting time

Professional

Digital display of operating parameters

Real-time digital display of down flow, inflow, exhaust volume, filter remaining life, UV lamp remaining life, negative pressure and positive pressure

Classic Series Biological Safety Cabinet (Type B2)

Scope of Application

Professional partial air purification equipment, it is suitable for cell biology, microbiology, biomedicine, biosafety and other related laboratories.

Product Advantages

- 100% exterior exhaust
- 4m corrosion-resistant corrugated hose (standard)
- Haier Biomedical exterior exhaust fan (optional)
- Interlocking between safety cabinet and exterior exhauster, enables remote control of exterior exhauster parameters with safety cabinet

Animal Containment Workstation

Scope of Application

Applicable for laboratory animal operations (surgery, weighing, etc.) in experimental animal centers of scientific research institutions, hospitals, colleges and universities, or experimental animal research and development projects and breeding institutions.

HR1500-IIA2-DW

Animal Containment Workstation

Product Advantages

Low Maintenance Costs

Experimental animal hair and debris are captured to eliminate the impact of hair debris and other debris on the service life of the fans and filters which ensures the cabinet is more durable

Sectioned Pre-filter

The interior of the sectioned pre-filter is easy to clean, and the pre-filter with a rear-mounted work surface is designed in sections, meaning the filter is easy to disassembled and sterilized as needed

The Dual System Ensures Maximum Safety

Each independent-controlled down flow and inlet airflow system is designed with dual fans, which ensures the stable airflow in the cabinet even if the pre-filter is 50% blocked. In the case of either damage to either fan, the air supply and exhaust system ensure safe air and protection

Stable Laminar Flow Offers Safety

The intelligent constant air speed design means that if abnormal air velocity is detected the fan adjust automatically to ensure the air speed stay within normal range

Product Features

Safety Interlock

Ultraviolet lamp, sash window, fans, and lamps are interlocked to eliminate hidden dangers of ultraviolet and microorganism leakage

Traceable

The work area in the cabinet is monitored by camera and the images are stored for future reference (optional)

Real-time Status Display

The digital screen displays in real time the flow rate of downflow and inflow airflow, the volume of discharged air, the temperature and humidity of the working area, the remaining service life of the filter, the UV lamp, the pressure in the negative pressure area, and positive pressure area. Users are alerted if abnormal operation is detected

Electric Foot Switch

When it is inconvenient to open the safety cabinet door with both hands, the electric front sash can be opened by foot switch (optional)

Specifications

Model	HR1500-IIA2-DW
Power (W)	1400
Downflow Velocity (m/s)	0.3
Inflow Velocity (m/s)	0.53

Laminar Flow Cabinet

Scope of Application

A professional localized air purification equipment suitable for pharmaceuticals, medical and health, scientific research laboratories of universities and colleges, photoelectric/microelectronics manufacturing and other fields

Horizontal Airflow
HCB-1600H

Product Advantages

Moisture-proof and flame-retardant glass fiber high efficiency particulate air filters (HEPA), ensure a filtration efficiency of 99.99% or above for particles of 0.3um or above

The air cleanliness conforms to Class 5 of the IS014644.1 Standard, and is better than Class 100 cleanliness requirements

Built-in lighting prevents exposure to fluorescent lamp to avoid eye stain

With the industry's first pre-cleaning function: namely pre-cleaning the workspace before sample treatment so as to further improve the protection of samples

One-key operation, convenient and secure:

- With a timed UV lamp turn off function, it is adjustable between 0 and 99 minutes
- With the lighting lamp and UV lamp interlock function; the UV lamp can only be lit when the lighting lamp is off. The UV lamp is turned off immediately if the fluorescent lighting is turned on to prevent mis-operation

Laminar Flow Cabinet

HCB-1300VS/1600VS

Product Advantages

- Positive pressure chamber design ensures air velocity uniformity and forms effective seal
- Ergonomic cabinet design with a 10 ° inclination, to improve user comfort during operation
- The workspace is made of easy-to-clean, high-quality, anti-corrosion 304 stainless steel
- The front sash window and the left & right- side glass panels are all non-reflective tempered UV glass to maximise natural light during operation, which also makes the glass easy to clean
- Designed with access ports on left and right sides, easy and convenient to mount valves such as gas supply

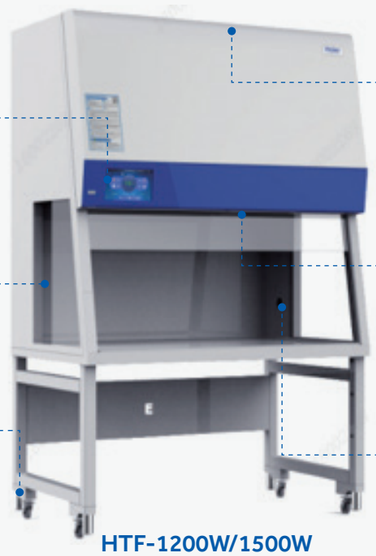
Ductless Fume Hood

Scope of Application

Haier Biomedical Ductless Fume Hood utilizes carbon filtration to protect laboratory personnel and the environment from toxic chemical fumes, odours, and particles. It is widely used in universities, public health, chemical and petrochemical industry, drug testing, museums and many other fields which involve the use of chemicals

Product Advantages

- Intelligent constant speed design, ensures the best adsorption effect of the filter
- Energy-efficient EC fan for a longer service life and reliable operation
- Offers a broad range of accessories and options to meet clients' different requirements
- Standard VOC sensor detects presence of volatile organic compounds in the exhaust and alarms to indicate filter saturation
- Multiple stackable filter types: remove vapor contaminants from the air, can be combined to handle different types of chemicals and particulates during the same application



10-inch touch screen
Real-time display of VOC concentration, wind speed, filter service life and UV lamp running time. Alerts when filter or UV lamp lifespan falls below 10%

Air velocity sensor
Intelligent constant air velocity ensures the stability

Universal casters with built-in threaded support legs

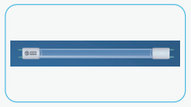
EC fan
Energy-efficient EC fan for a longer service life and reliable and quieter operation

PIR detection
In intelligent mode, the PIR sensor will detect when the operating area has been clear of personnel for more than 15 minutes and automatically switch to LNS green-saving mode

Electrical sockets
Included as standard are two, waterproof sockets with timing technology, which allows the user to program timed on/off function

HTF-1200W/1500W

Optional Components



UV lamp

IoT module

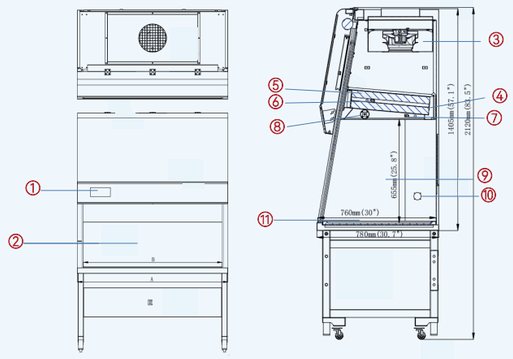
Dual surveillance cameras

Height adjustable stand

Electrically operated glass sash

PVC worktable

Product Dimension



1.Microprocessor Control System
2.Tempered Glass Sliding Sash Window
3.EC fan
4.First filter
5.Second filter(optional)
6.VOC sensor
7.Temperature and humidity sensor
8.Wind velocity sensor
9.Tempered Glass Side
10.Electrical sockets(2 on each side)
11.Powder coated steel worktop

Types of Filters

Carbon filters are used to remove toxic gases, hazardous fumes, and odors. These filters are constructed from high-quality carbon pellets and durable chemical-resistant cases. Below is Haier Biomedical filters list

Code No	Name	Suitable Applications
A	Standard Filter (Mixed with N4A1, N4B1 and N4G1 activated carbon)	Suitable for all common laboratory chemicals, especially with organics. When no specific requirements are present, or when more than one type of chemical is used
B	Organic Solvent Filter (N4G1 activated carbon)	Removal of toluene, benzene, xylene, acetone, acetic acid, carbon tetrachloride, chloroform, CxHy, VOC , etc
C	Acid Gas Filter (N4A1 activated carbon)	Removal of hydrochloric acid, sulfuric acid, hydrofluoric acid, hydrogen sulfide, sulfur dioxide , etc
D	Alkaline Gas Filter (N4B1 activated carbon)	Removal of ammonia, amine, etc.
E	Formaldehyde Filter	Mainly used for adsorption of formaldehyde
F	Particle Filter	Mainly used to absorb dust

Specifications

Model		HTF-1200W	HTF-1500W
Power Supply (V/Hz)		220/50/60	220/50/60
Power (W)		1200	1300
Sound Level (dB(A))		≤58	≤58
Inflow Air Velocity (m/s)		0.4-0.6	0.4-0.6
Fluorescent Light Intensity (lux)		≥1000	≥1000
Filtration Elements	First Filter	Activated Carbon with Granular Media bed (6 different filter types available , codes A-F)	
	Second Filter (optional)	Activated Carbon with Granular Media bed (6 different filter types available , codes A-F)	
Exterior Dimensions (W*D*H)(mm)		1336*780*2120	1636*780*2120
Operation Dimensions (W*D*H)(mm)		1230*760*655	1530*760*655
Packaging Dimensions (W*D*H)(mm)		1400*925*1665	1700*925*1665
Net Weight (Kg)		230	250
Packaging Weight (Kg)		290	330
Display		10 inch screen	10 inch screen
VOC Sensor		Standard (1)	Standard (1)
Certification		CE	CE
