

Benchtop Low-Speed Refrigerated Centrifuge LX-60T750R

Scope of Application :

With a variety of large-capacity rotors, it can meet the needs of clinical biochemistry, molecular biology, cell culture and other large-throughput sample processing, and is widely used in medical, scientific research, pharmaceutical and other fields.

It also serves as IVD laboratory equipment when used with IVD tubes and diagnostic analysis systems, separating human blood for hematological, immunological, and cardiovascular diagnostic tests.

Short pre-cooling time and precise temperature control performance

Wide range of rotors for application flexibility, compatible with tubes/bottles from 0.2 ml to 750ml

Real time loading imbalance detection, immediate shutdown protection in case of imbalance

Qingdao Haier Biomedical Technology Co., Ltd.

Product Features

Short pre-cooling time and precise temperature control performance

Wide range of rotors for application flexibility, compatible with tubes/bottles from 0.2 ml to 750ml

Use of brushless induction motors to provide maintenance-free operation, eliminating carbon particle emissions

Optimized sound design for low noise levels ($\leq 63\text{dB(A)}$)

Automatic rotor identification and rotor life monitoring for maximum operational safety

Real time loading imbalance detection, immediate shutdown protection in case of imbalance

Only 35 seconds to rise to the maximum speed under full load of 4*750ml

Low center of gravity design, amplitude less than 0.06mm, ensuring stable operation and good centrifugal effect

Intuitive Interface

The 7-inch 45° glove-friendly touchscreen, the wide viewing angle more comfortable and practical for users of all heights

Further enhanced with access controls such as user login with password protection, the independent program data of each user is managed separately

Quick recall of up to 1000+ programs with alpha-numeric naming to minimize time between runs and for quick run start by routine users

The speed, centrifugal force, time and temperature can be changed by user during the centrifugation process

9 acceleration + 10 deceleration stages

The screenshot shows a user interface with the following elements:

- Top Bar:** Status icons (Wi-Fi, alarm, help), time (3:46 PM), date (13 Dec 2023), and user status (Visitor, Login).
- Control Panel:** A large central display showing '0 RPM', '00:00:00', and '23°C'. Below this, it shows '6000 RPM / RCF' and a checkmark next to '00:20:00'. At the bottom are four large buttons: a snowflake (refrigeration), a double arrow (fast centrifugation), a play button (start), and a lid icon (lid-closing status).
- Right Side:** A vertical list of program numbers (1-5) and a 'More' button.

Annotations point to specific features:

- Acceleration/Deceleration rates:** Points to the '9' and '9' indicators at the top of the control panel.
- Target speed/centrifugal force and real-time speed display:** Points to the '0 RPM' and '6000 RPM / RCF' displays.
- Temperature set-point and real-time temperature display:** Points to the '23°C' and '4°C' displays.
- Quick access to stored programs:** Points to the program list (1-5) and 'More' button.
- Clear one-touch buttons:** Points to the snowflake, double arrow, play, and lid buttons.

Product Parts

Intelligent lid locking monitoring and dual automatic self-locking to ensure safe operation

Dual gas springs with safety protection

Drainage tray to prevent internal water accumulation and improve corrosion resistance

Triple-layer construction to ensure safe use

316 stainless steel centrifuge chamber is rust-free and easy to clean

USB port for exporting operation record including speed, time and temperature, operation curve with alarm messages etc

Key Features of Quick-Flip Biocontainment Safety Lids

- ◎ **Quick-Flip Hinge Design**
Our hinged lids do not need to be removed from the rotor. Just a quick flip gives you fast access to your samples
- ◎ **Low-Pressure Closing Clip**
The simple low-pressure clip offers a secure closure with an audible "click" and visual cues, enhancing safety and replacing multi-turn screw caps or complex lever systems
- ◎ **Ambidextrous & Glove-Friendly**
Designed for ease of use, our lids can be operated with either hand and are glove-friendly, ensuring seamless operation
- ◎ **Premium Polymer Construction**
Made from Polyetherimide (PEI), our lids provide excellent chemical resistance, transparency, and durability
- ◎ **Certified Safety and Reliability**
Independently tested and certified per IEC-61010 Section 2-020 Annex AA, ensuring top-level safety and performance

Choose our Quick-Flip biocontainment safety lids for innovative, safe, and durable lab solutions.
